

CHOOSING YOUR KITCHEN
Designed Exclusively for You

PARTNERS IN EXCELLENCE

Premier's success is driven by values of excellence and teamwork, which is why we partner with the most recognized designers in the country. Elite professionals, our design associates are hand-selected by Premier for their talent and business acumen.

Bailiwick is one of Premier's trusted partners. Consistently recognized as one of the most accomplished and skilled award-winning designers in South Florida, Missi Davis and her team have been generating carefully designed and meticulously handcrafted custom rooms for over 30 years.

Missi's capacity for understanding the detailed process necessary in creating custom cabinet designs allows her to satisfy her client's aesthetic preferences. She says; "the discriminating homeowner knows the kitchen is their bailiwick" and she approaches each design as an integration of the kitchen into the home. We highly recommend Bailiwick for all your custom cabinetry and millwork needs.

ABOUT PREMIER

Known for our engineering, commitment to quality, and a design forward approach in working with unique and interesting materials, Premier can facilitate any room the designers at Bailiwick create.

We source our own woods, lay-up our own veneers, develop and manufacture our own door and drawer styles, and create unlimited finish options. These are our core capabilities.

Our keen understanding of product application, craftsmanship, and artisan skill speak to how the combination of design and manufacturing creates stunning, one-of-a-kind rooms.

CONSTRUCTION

A definitive measure of woodworking competence is building products that endure the tests of time, temperature, and movement. To that end the quality of our door, drawer, and cabinet construction is our top priority.

A tight-fitting joint, exact machining, and precise gluing applications which are fully-cured under pressure, result in uncompromised door and cabinet strength, and ensure long-term product performance.

At Premier we develop and manufacture our own door styles. Designed for both overlay and inset applications, no matter what style you choose, every door and drawer is fit to its specific cabinet opening to ensure correct size and margins.

A full finger joint is used on all drawer boxes and roll-out shelves, providing extremely functional and very beautiful joinery.

VENEER

Modern woodworking would not be the same without veneer. Veneer allows us to work with a material that offers unique and unlimited visual effects while producing durable, long-lasting products.

Some of the most beautiful trees in the world are harvested for veneer, and our wood buyer travels the world to find them. Each veneer species has its own interplay of color, grain, figure, and texture, while each log within the species possesses its own individual characteristics.

Veneers are used in both Contemporary and Traditional applications, and the material choice and lay-up sequence are carefully planned. At Premier every project is processed individually, with the veneer selection tailored to each job. With our decades of skill and experience in working with veneer, we know how to develop each project to make it special.

From being a sustainable choice to providing the most dramatic and beautiful designs, specifying one of our exquisite, hand-selected veneers provides you with a truly custom project!

FINISH

The ability to create the color, feel and character you want for your project is a “best-in-class” trait of ours, and we have the most comprehensive finish capabilities and options in the cabinet and millwork industry.

Stain, Paint, Milk Paint, Polyester, Pure Metal, Powder-coat, and Metal Plated finishes are just the beginning of an endless array of choices. When combined with sheen levels encompassing everything from matte to high gloss, numerous glaze options, a variety of finishing techniques, and many distressing packages, we have the ability to create very individual rooms for our clients.

Our color lab technicians have developed over 5,000 custom colors and effects, ranging from extreme rustic to sophisticated contemporary — a true testament to the fact that we can create any look you desire.

UNIQUE MATERIALS

With new trends come new opportunities to stay on the leading edge of design, and as the market ebbs and flows with everything from interesting colors and textures, to special materials and hardware, so too does Premier's product offering and manufacturing capabilities.

Beautiful reconstituted and hide leathers, reclaimed canvas, unique laminates, many types of metal inserts, and a variety of textured, printed, mirrored, and back-painted glass selections, are just a few examples of the materials we work with.

Custom requests are always an option, so if you find a material that you "have-to-have" let us know.

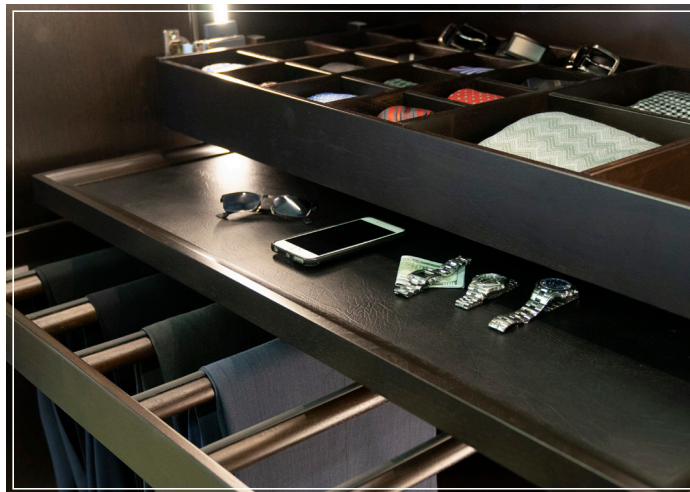

INTERIOR ACCESSORIES

With a broad range of custom interior accessories, we have storage solutions for every room in your home. From cutlery trays and knife blocks to jewelry dividers and closet organizers, our accessories are beautifully crafted and stylish.

Like every component that makes a product special, accessories are rigorously tested to make sure they can stand the test of time and use.

Designed to accommodate any scenario, we can custom fit our interior options to meet your every need.
